# DISCLAIMER

This Black Paper is a detailed document outlining different aspects of this project. This document is a primary source of information about us. The information provided in this Black Paper does not recommend participation in token presale. It is not investment advice, financial advice, trading advice, or any other sort of advice, and you should not treat any of the Black Paper's content as such.

The details provided in this Black Paper are accurate to the best of our knowledge. By participating in this presale, or any future token transaction, the investor should accept the security risks and potential financial losses, and we cannot be held responsible. Do your due diligence and consult your financial advisor before making any investment decisions.

We genuinely believe that the users will benefit by participating in this project. If you reside in a location where blockchain or/and cryptocurrency usage is illegal, please do not click on anything related to these activities on this project. You must be the legal age to click on any gaming-related items. The minimum age varies from region to region. Please refer to our age guidelines if you need more details.

Recognizing that the laws and regulations involving similar projects are different everywhere, users are advised to check with the laws within their jurisdiction or region to ascertain the legality of the covered activities. No other rights are transferred to the token holders. Our sole responsibility is to distribute the tokens under the conditions set out in the Black Paper.

# 1. EXECUTIVE SUMMARY

About 10% of the global population lives in extreme poverty. DUBLE is a social and economic development project for black people worldwide, focusing on using emerging technology to alleviate poverty. There is a massive lack of access to finance and efficiency in philanthropy, especially regarding the distribution of funds. Infrastructure, intermediaries, and border issues complicate reaching those in need.

COVID has had a measurable impact on the ever-widening income gap. It is time to adopt a new approach to philanthropy that is transparent, crowd-sourced, and open to anyone. Black communities are enduring social and economic problems that can be solved by taking revolutionary steps and utilizing new fintech opportunities.

The DUBLE is a unique project designed to quickly and effectively alleviate poverty in black communities by merging the principles of unconditional basic income and blockchain technology.

This Black Paper highlights the problems faced by the black communities worldwide, followed by a detailed discussion about the DUBLE, a decentralized development project for the global black community.

# 2. SUFFERINGS OF BLACK COMMUNITY

We live in one of the most urgent and challenging times in history as a society. Poverty is the most significant limiting factor for human potential and development. It's the number one goal of the United Nations 17 Sustainable Development Goals, outlined in 2015. For decades the traditional system has tried to end poverty and racial discrepancies. It's time for a new approach that is sticky, censorship-resistant, fully transparent, autonomous, with maximum capital efficiency, and open to anyone in the world.

## Biasness Against Black Community

August 2019 marked the 400th year documented that African people landed on the soils of the land that has become the United States of America by the Transatlantic Slave

Trade. After over 400 hundred years, biases against black people still exist.

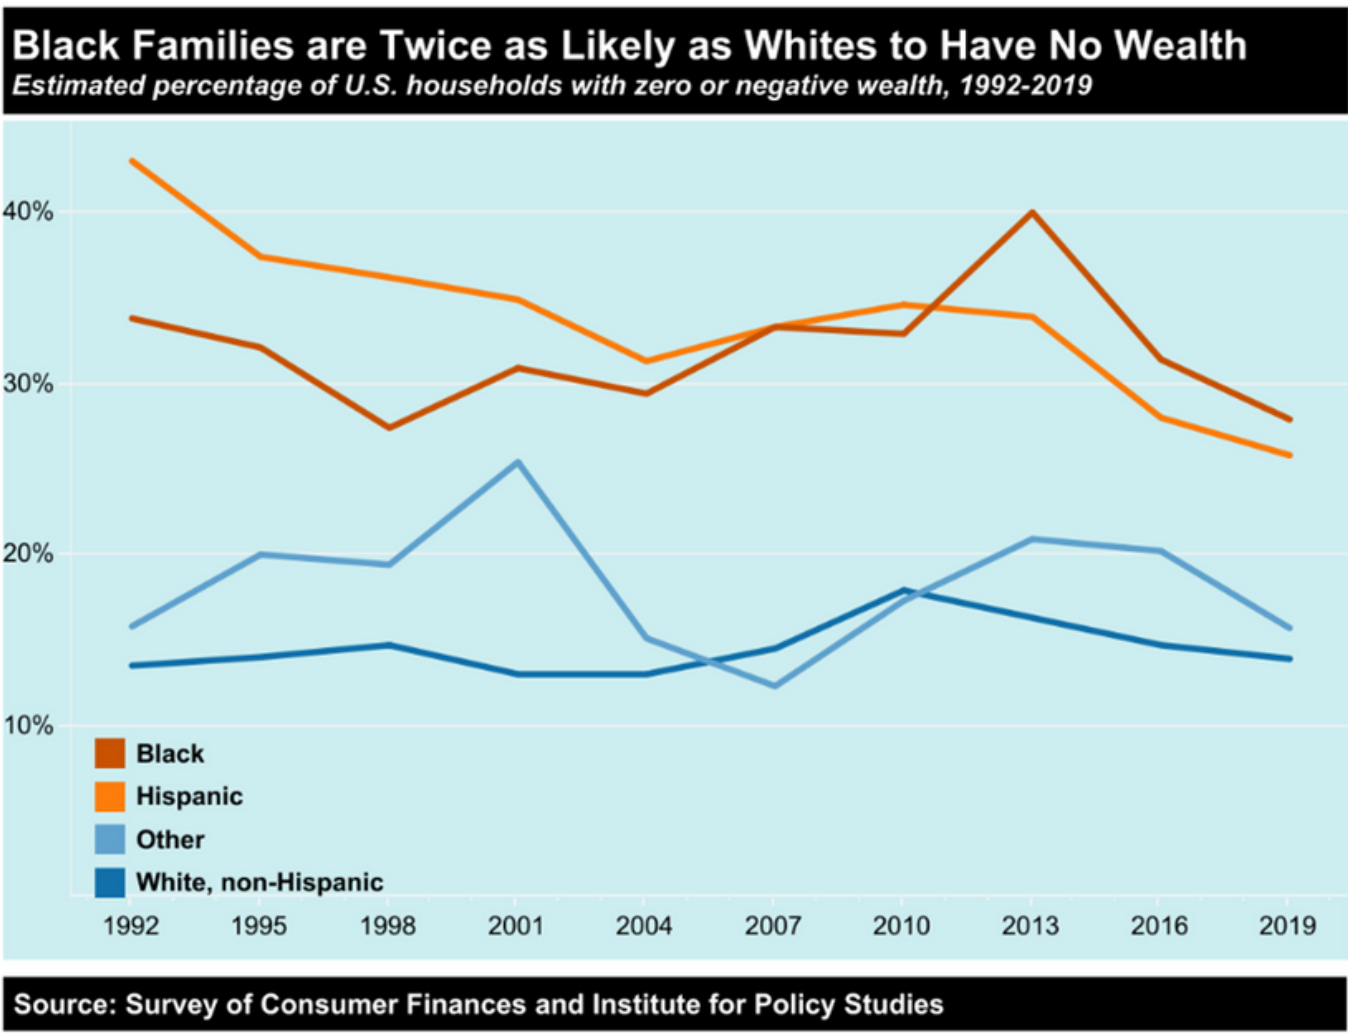

## Black Community and Inequality

Inequality against African Americans exists everywhere in the United States and other countries. Besides other social and economic problems, African Americans have always been more vulnerable in the labor market. The American health care system is beset with inequalities that disproportionately impact people of color and other marginalized groups.

According to the Survey of Consumer Financer Data, the median Black family has \$24,100 in wealth. This is just 12.7 percent of the \$189,100 in wealth owned by the typical white family. The median

Latino family, with \$36,050, owns just 19.1 percent of the wealth of the median White family. Our Racial Wealth Divide Report discusses this growing divide and provides solutions for this massively impactful issue.

To reduce the inequality against black people, the DUBLE will provide opportunities to gain assets automatically, for free. We aim to help needy people own their investments to have a safer, more prosperous life.

# 3. INTRODUCING THE DUBLE

## About the DUBLE

We will enable the black community to access a basic income through proprietary DUBLE intelligent contracts with specific parameters. Beneficiaries added to that contract can claim a basic income regularly and use it for whatever they need to buy.

For example, a family in Chicago can access \$20 (of our project) per week. Every four weeks, they will be able to buy something they need. Or a community center in Detroit that is underfunded could have access to \$250 per week for programs and operations. These are just examples; the possibilities are countless due to the need and the potential of digital currency combined with investment.

## Impact Measurement

We are also developing a framework to correctly measure the impact (economic development and social improvement) we are causing in this space. Some of the leading indicators of social progress and economic growth are health, education, children's situation, and happiness.

## Team Behind the DUBLE Project

The DUBLE is a major blockchain project run by a team of highly professional individuals who have been working with large private organizations and non-governmental organizations. Team DUBLE has designed this project to help and support the masses in a short period.

## Decentralized Autonomous Organization (DAO)

This project is going to become a decentralized autonomous organization (DAO) where the users will be able to have access to financial services, including but not limited to microcredit, collective savings, and lending. Thus, the token-owners community can control and direct funds in the DAO with no influence from a central authority. The rules are embedded in the code, so no managers are required, so our organization is free from bureaucracy and hierarchy.

### Farming Function

The top management will closely monitor the project's progress and focus on the impact of DUBLE among black communities worldwide. The participants will be

able to farm tokens rewards just by donating money.

To improve self-sustainability and prosperity in those communities, we will provide access to more financial services down the road by integrating and leveraging existing Defi (Decentralized Finance) protocols for peer-to-peer financial services on public blockchains, primarily the Polygon blockchain-based financial services and products that operate without the need for centralized institutions.

The DUBLE is a major blockchain project that can significantly impact in the years to come. However, it is essential to engage in partnerships to multiply the effect using minimal resources. We will partner with corporations, non-governmental organizations, and governments fighting poverty to take strong measures towards alleviating poverty.

# 4. TECHNOLOGY AND FEATURES

## Blockchain

The DUBLE is a decentralized development project powered by the Polygon blockchain. The token name is the Dividends for United Black Liberation Economic (DUBLE) Crypto. The DUBLE token will be launched under the MATIC standard of smart contracts.

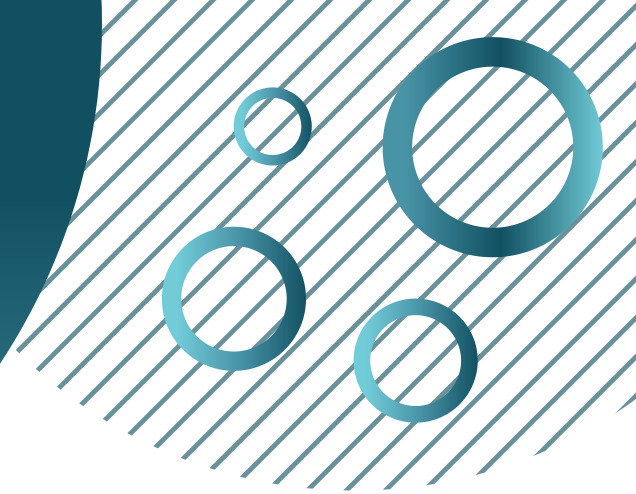

To build black communities, we will use our cryptocurrency to circulate funds (supported through Black Financial institutions and businesses) to support black businesses.

## NFT Marketplace

This project will also build an NFT marketplace that will allow users to buy, sell, and trade NFTs. The most advanced NFT standards will essentially power the NFT part of the project. It will work like a Shopify store where the users will pay in cryptocurrency and fiat currency to buy NFTs.

# 5. TOKEN

## Token Features

The token name is DUBLE Crypto, and it is a community-driven liquidity generator on the Polygon Network. Each trade consists of two functions: reflection and LP generation. During each trade, 3% will be returned, while 2% will be distributed to holders of current tokens. This will result in 5% in transaction fees.

The DUBLE Crypto community is driving the development of a community-driven token to support its targeted communities. Tokens will be used to fund community-driven projects in the targeted communities. The DUBLE Crypto is different from other coins because it aims to see how the community can work together and grow the communities for the targeted communities.

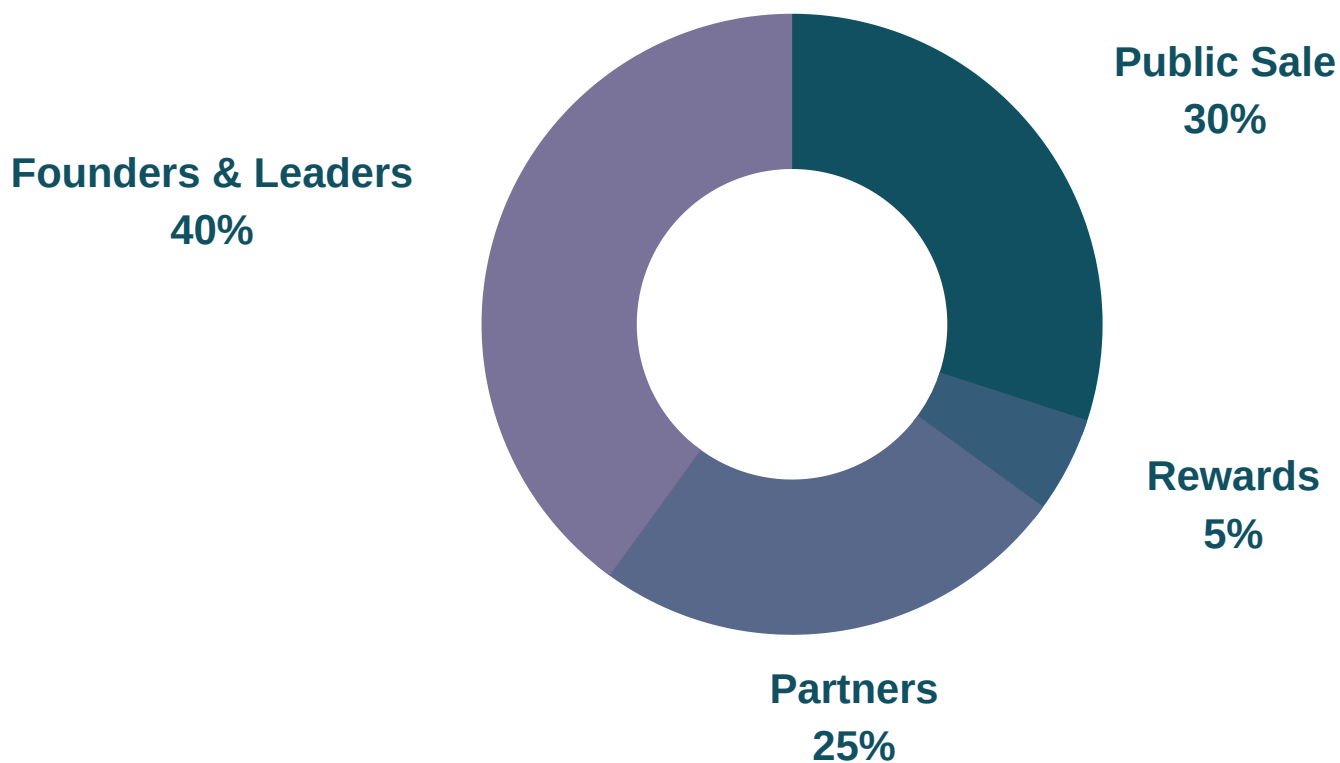

## Token Details

|                      |                           |
|----------------------|---------------------------|
| <b>Token Name</b>    | <b>The DUBLE Crypto</b>   |
| <b>Token Type</b>    | <b>MATIC (Polygon)</b>    |
| <b>Token Symbol</b>  | <b>DUBLE</b>              |
| <b>Initial Value</b> | <b>\$0.1</b>              |
| <b>Total Supply</b>  | <b>2.5 Billion DUBLES</b> |

# 8. FOUNDER

## Cazzie Williams

*Founder and CEO*

The DUBLE Crypto is a team of knowledgeable and skilled people specializing in various areas. The company's founder is a leader in consulting for supply chain services to external global clients. With extensive experience in engineering technology, sourcing, and leading supply chain projects for various global industries, he has worked for, among others, consumer goods, industrial, aerospace, medical, and military.

Our founder is a dynamic, results-oriented leader with experience in sourcing, engineering, operations, and international business development in various global industries. Experienced in managing both on-site and remote teams, he has demonstrated to economize on costs and improve processes. As a worldwide transformation leader, he has transformed organizational structures, reengineered roles, and developed and mentored staff to improve and standardize processes.

As a result of his passion and expertise, he has also served on various university and private sector advisory boards.
